

Individual reflection week 5 - Hampus Ekberg

What do I want to learn or understand better?

This sprint we had a more extensive startup meeting and daily checkup meetings. This had a great effect on everyone's productivity and made me more interested in learning more about scrum to improve productivity even more.

How can I help someone else, or the entire team, to learn something new?

As far as technical aspects I have a pretty good overview of the project and could probably help someone else understand how our different parts work together.

With the process we can all help each other just by discussing what changes in the process we would like to see and what changes worked/didn't work.

What is my contribution towards the team's use of Scrum?

I have contributed to the team's use of scrum by being active in the startup meeting, coming to the daily checkup meeting and discussing what I and the others have done so far and what issues we ran into.

What is my contribution towards the team's deliveries

I contributed by completing the tasks I was given. This was mostly based around the map and addresses like address autocomplete and saving the location on every map to show it on the map.
