

Individual reflection week 6 - Hampus Ekberg

What do I want to learn or understand better?

Like last week I would like to learn and understand more about general Scrum and agile practices.

How can I help someone else, or the entire team, to learn something new?

Same as last week.

What is my contribution towards the team's use of Scrum?

I have contributed to the team's use of scrum by being active in the startup meeting, coming to the daily checkup meeting and discussing what I and the others have done so far and what issues we ran into.

What is my contribution towards the team's deliveries

This sprint, since it was our last one, we worked mostly on polishing our application instead of adding new features. So what I did to contribute to the team's deliveries was just general design changes and bug fixes.
