

Individuell reflektion 2 - Henrik Tao

29/03/2019

What do I want to learn or understand better?

I want to fully understand the scrum backlog, both product backlog and sprint backlog and its components. I want to learn to formulate valuable and useful user stories which follow the INVEST criterias to be able to utilize the fullest potential of Scrum.

How can I help someone else, or the entire team, to learn something new?

This week I introduced a software called Figma to our project group. Figma is a tool which we use to create our mockup for the software project. It is a very interactive way of presenting a visual mockup.

What is my contribution towards the team's use of Scrum?

The sprints have not started yet, it will start next week therefore I have not contributed towards the team's use of Scrum yet. However, the whole team have started to think and discuss about user stories, acceptance criterias and definition of done which will structurize the working process for the group during the sprints.

What is my contribution towards the team's deliveries?

This week I contributed to the mockup of our application. Together with the project group we discussed the features and interactive aspects to consider when creating a mockup. Thereafter we put our ideas together into a mockup of our application called, Pantad.
