Individuell reflektion 3.5 - Henrik Tao

05/05/2019

What do I want to learn or understand better?
I want to learn how to implement UI in android studio. The other team members have been implementing the UI as for now. My user story did not require UI implementation.

How can I help someone else, or the entire team, to learn something new?
In order to help someone else, or the entire team, to learn something new, I am willing to beforehand learn new stuff. When implementing my user story I learnt how to access our database and update the data, in addition, I learnt how to access a device ID. These are the two things I can show to my team members. Basically, share my knowledge with my team members.

What is my contribution towards the team's use of Scrum?
I always refer to the scrum board that we have when discussing.

What is my contribution towards the team's deliveries?
I have finished the user stories that I have chosen to work with. Because of user stories not being properly vertically sliced a team member had to wait until I finished my user story.
