Individuell reflektion 4 - Henrik Tao

12/05/2019

What do I want to learn or understand better?
I want to understand how to answer the points on the team reflection.

How can I help someone else, or the entire team, to learn something new?
If there is something we need I would research about it and then share my knowledge with the team.

What is my contribution towards the team's use of Scrum?
Same as last week

What is my contribution towards the team's deliveries?
Not much, this week I refactored some terms and classes from swedish to english. And I have integrated sonarqube to check the code quality.
